

# INN8 Invest High Growth

Monthly Model Portfolio Factsheet As of 31/10/2023

## Portfolio Information

Discretionary Fund Manager	INN8 Invest
Client Need	High Growth, Low Income
Outcome Objective	SA CPI +4-5% net of fees over rolling 7-yr period
Benchmark	ASISA South African MA High Equity-Average
Launch Date	1 January 2022
Risk Profile	Moderately Aggressive

## Risk Description

This portfolio is suitable for investors who seek long-term capital growth. These investors have an investment time horizon of more than seven years and are comfortable with medium to high levels of market volatility and the potential of capital loss over the short to medium term. This portfolio has a high allocation to growth assets and should therefore be seen as a moderately high-risk strategy.

## Investment Objective

This portfolio seeks to provide long-term growth of capital and modest income, with a low probability of capital loss over the long term. It aims to outperform the ASISA South African MA High Equity peer group average and achieve an outcome of SA CPI plus 4-5% p.a. (i.e. to provide a real return of 5% p.a.) over a rolling seven-year period. Typically, this portfolio's exposure to equities will be between 40% and 75%, but this may vary depending on market conditions.

## Investment Strategy

This portfolio uses a multi-manager approach with a flexible asset allocation strategy. Asset allocation decisions are largely outsourced to the underlying portfolio managers. Manager selection and blending is an integral part of the service provided by INN8 Invest. As the appointed DFM of the portfolio, INN8 Invest will monitor the portfolio on a continuous basis, ensuring alignment to all of the stated objectives.

## What costs can I expect to pay?

Model Portfolio Charge (MPC) incl. VAT	0.29%
Underlying Funds TER incl. VAT	0.96%
Underlying Funds TIC incl. VAT	1.17%

The Solution charges a Model Portfolio Charge of 0.25% p.a., ex VAT (0.29% incl. VAT), and this fee is accrued daily and paid monthly via a repurchase of units from the investor. Charges relating to the underlying portfolios are included in the TER and TIC, and these are payable within the underlying portfolios' NAV.

**Underlying Funds TER:** The weighted-average of the Total Expense Ratios (TER) of the underlying portfolios. Each fund's TER represents the fund's charges, levies and fees. A higher fund's TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER should not be regarded as an indication of future TERs.

**Underlying Funds TIC:** The weighted average of the Total Investment Charge of the underlying portfolios. TIC represents the fund's TER plus brokerage, securities transfer taxes and STRATE levies.

## Performance (Net of Investment Fees)

Source: INN8 Invest and Morningstar. Quoted returns are net of MPC and TIC but are gross of tax, platform fees, advisory fees. The Solution launch date is 1 January 2022, and any performance prior to this is modelled using actual historical returns of the underlying portfolios as at inception for illustrative purposes. The Since Inception return figures reflect annualized performance since the start of the back-testing period of the model portfolio (not the period since the model was launched). The Since Inception date is 12 January 2017. It is not possible to calculate back-tested returns for periods earlier than this due to a lack of performance history for one or more of the underlying funds used in the model portfolio. Returns are not guaranteed and historical returns are not an indication of expected future returns.

Advice Fee | INN8 Invest does not provide financial advice and therefore does not charge advice fees. However, where an annual advice fee has been negotiated between the investor and their financial adviser, the advice fee will be paid by the LISP via a repurchase of units from the investor's account.

Effective Annual Cost (EAC) | For EAC calculations of the Solution, please refer to the investor's LISP statement. The Model Portfolio charge will be reflected in the "Other" category of the EAC table, whilst the in-fund fees of the underlying portfolios in the "Fees for Investment Management" category. Disclaimer
